

# Welcome

**Thank you for attending today's meeting.**

**The purpose of this meeting is to:**

- Share the reasons why your sewer rates are being raised.
- Explain how much your rate will be increased.
- Present information about needed future improvements.

We encourage your participation and welcome your questions and comments. Nampa's Wastewater Program Management Team and City staff are available to answer your questions.

# What is Wastewater and Where Does it Go?

Wastewater is used water from washing machines, dishwashers, sinks, toilets, showers, bathtubs and industrial manufacturing and operating processes.

---

The City of Nampa's wastewater treatment plant is one of the largest in the state, and treats 10.5 million gallons of wastewater each day generated by residents, businesses and industries.

---

After water is thoroughly treated at Nampa's wastewater treatment plant it is discharged into Indian Creek.
